

THE EDGE ON AUTOMATION

Dear Customer:

Congratulations on your selection of Lawrence Equipment machinery. This booklet documents the required information for your Lawrence Equipment **CHIP FRYER**. It is highly recommended that before attempting to operate the equipment, you read and familiarize yourself with all operating, safety features and maintenance procedures.

Your Lawrence Equipment Service Technician will gladly go over all aspects of your equipment outlining all the required maintenance procedures. Your machine needs these services to maintain the safety, dependability, and performance that has been engineered and built into it. You can always be sure that Lawrence Equipment will be just one phone call away for all your service needs. Calling Lawrence Equipment for all your service needs assures you quality Lawrence Equipment replacement parts.

Keep safety in mind at all times. Before working, cleaning, or maintaining the equipment, it is highly important to lock out all of the energy sources according to OSHA (or local safety) regulations. Only people with the proper qualifications, training, and authority from the management shall work or maintain this equipment.

Please note that due to constant improvement of our equipment, parts of this manual may differ with the actual mechanisms on the machine you have purchased.

Thank you,

LAWRENCE EQUIPMENT
